30 East Broad Street, Columbus, Ohio 43266-0423

August 12, 1992

MEDICAL ASSISTANCE LETTER NO. 306-H

TO: All Providers of Pharmacy Services
Directors, County Departments of Human Services
Directors, District Offices

FROM: TERRY A. WALLACE, DIRECTOR *Terry A. Wallace*

SUBJECT: PHARMACY PROGRAM UPDATES

ASSISTANT DIRECTOR
FOR ADMINISTRATION

92 AUG 14 PM 3:39

DEPUTY DIRECTOR
FOR MEDICAID
ADMINISTRATION

Included in this Medical Assistance Letter (MAL) are the following attachments.

- Additions - Effective August 17, 1992 (A)
- Additions - Effective October 1, 1992 (B)
- Changes - Effective August 17, 1992 (C)
- Deletions - Effective August 16, 1992 (D)
- For the following drugs the MAC (Maximum Allowable Cost) has been expanded, and in some cases changed, to include the innovators. The innovators will be listed with a MAC price and an "A" in the P.A. field. As such they can be billed directly as your multisource option and will be reimbursed at the lower of MAC price plus dispensing fee or your usual and customary charge. If the innovator is medically necessary AND prior authorization has been requested and approved, reimbursement will then be based on the lower of the allowed charge or your usual and customary charge. Allowed charges will be based on AWP-7% or direct price, depending on the labeler, plus the prior authorization dispensing fee: Acetylcysteine Solns 10% and 20%; Minoxidil 2.5mg; Hyoscyamine Sulfate 0.125mg; Albuterol Syrup 2mg/5ml; Pilocarpine Solns 0.5%, 1%, 2%, 3%, 4%, 6%; Tolmetin Sodium 200mg, 400mg; Minocycline HCL 50mg, 100mg; Antipyrine-Benzocaine Ear Soln; Clemastine 1.34mg, 2.68mg, 0.67mg/5ml; Childrens Chewable Vitamins and Infant Vitamin Drops.
- MAC has been changed for the following drugs: Oxazepam 10mg, 15mg, 30mg; Atenolol 50mg, 100mg; Diphenoxylate/Atropine Soln; Dicyclomine 20mg; Adult Liquid Vitamins; Primidone 250mg; Potassium Chloride 8meq; Phenobarbital Sodium Inj 30mg/ml.

OHIO
the heart of it all!

An Equal Opportunity Employer

OH 00012022

MAL NO. 306-H

Page 2

- New generic entries include: Albuterol 0.83mg/ml; Atenolol/Chlorthalidones; Guaifenesin/Pseudo 600/120; Loperamide 2mg and Methylprednisolone Inj 125mg.
- A new microfiche is being created and should be sent to you shortly.
- Accurate Coding.

Manufacturers are required to pay rebates based on the department's documentation of having reimbursed pharmacy providers for their specific NDC coded drugs.

The withholding of rebates by certain manufacturers, when they feel that their products are being billed even though their products are not being dispensed, has forced the department to make inquiries concerning proof of purchase. Some of these inquiries have revealed that some pharmacy providers load an NDC into their computer which may not reflect the actual product being dispensed. Even if no economic benefit accrues as a result of this action, please be advised that this is still a misrepresentation of the services performed.

The regulations set forth in OBRA-90 allow auditing of pharmacy providers as part of the dispute resolution process. The department is obligated to audit where suspected misrepresentations are evident. Thus, the department encourages you to make every effort to ensure that the specific NDC code billed represents the specific drug dispensed. Your cooperation in this matter is appreciated.

MEDICAID BULLETIN

PHARM 92-08

TO: PHARMACEUTICAL SERVICES PROVIDERS
SUBJECT: REVISED UPPER LIMITS OF PAYMENT

In conformity with the Health Care Financing Administration's (HCFA) additions and revisions to the existing upper limits of payment list for selected multiple source products, South Carolina Medicaid has published the revised Upper Limits of Payment List that includes recent federal changes. For dates of service beginning December 1, 1992, the attached revised upper limits of payment for multiple source products will be effective. This listing replaces the previous Upper Limits of Payment booklet dated September 1990.

In addition to an alphabetical listing by generic name, an alphabetical listing by the commonly known brand name has been included. **The listing of certain brand name items is representative only and should not be considered all inclusive.** All generic equivalents of these products are subject to the respective upper limits of payment. Please bear in mind that unit-dose NDC numbers are exempt from such pricing limitations.

Providers are reminded that only rebated products (whether brand name or generic) may be considered for Medicaid reimbursement. Certain product additions to this listing have both legend and over-the-counter (OTC) packaging. Bear in mind that unless the OTC items are included in the current listing of covered OTC products, then only the legend, rebated packages are reimbursable. The listing of covered OTC products may be found in the Pharmaceutical Services Medicaid Manual.

Pharmaceuticals with a South Carolina Maximum Allowable Cost are identified with the acronym "SCMAC." Products (or package sizes) which have been added to the upper limits of payment listing are marked by an asterisk.

Please note on the revised upper limits of payment list that many product reimbursement rates have changed. Also, numerous products have been added; some items have been deleted. Therefore, providers are urged to carefully review this revised listing.

MEDICAID BULLETIN

November 16, 1992

Page 2

Please bear in mind that when a pharmacist agrees to dispense (and bill) a prescription to the Medicaid program, the pharmacist must accept the amount Medicaid reimburses as payment in full. Under no circumstances may the patient be billed the difference between the submitted charge and Medicaid's reimbursement rate.

The upper limit of payment for a multiple source product for which a specific limit has been established does not apply if the prescriber certifies in his/her own handwriting that a specific brand is medically necessary for a particular patient. The handwritten phrase "brand medically necessary" or "brand necessary" must appear on the face of the prescription.

A dual line prescription form does not satisfy the brand medically necessary certification requirement. Additionally, a check off box on a form is not acceptable. The prescriber's handwritten notation certifying "brand necessary," included on the prescription, is the only allowable means for obtaining Medicaid reimbursement for the brand name product. Procedures which must be followed to obtain reimbursement for the brand name product are outlined in the Pharmaceutical Services Medicaid Manual.

Upon receipt and careful review of the requested documentation, an adjustment will be processed to reimburse the provider at the brand name pricing level. Please be advised that "brand medically necessary" adjustments can only be made after claims have processed and been paid. Additionally, appropriate documentation must be furnished for each date of dispensing to be adjusted.

Questions regarding this bulletin should be directed to the Department of Pharmaceutical Services at (803) 253-6179.

Eugene A. Laurent, Ph.D.
Executive Director

MEDICAID BULLETIN

PHARM

00-08

TO: PHARMACY SERVICES PROVIDERS

SUBJECT: REVISED UPPER LIMITS OF PAYMENT

In conformity with the Health Care Financing Administration's (HCFA) additions and revisions to the existing upper limits of payment list for selected multiple source products, the Department of Health and Human Services has published the revised Upper Limits of Payment List. For dates of service beginning **December 7, 2000**, the attached revised upper limits of payment for multiple source products will be effective. This listing replaces the previous Upper Limits of Payment booklet dated September 1998.

This booklet includes an alphabetical listing by generic name (with the commonly known brand name also noted) of those products with upper limit of payment restrictions. All generic equivalents of these products are subject to the respective upper limit of payment. Unit-dose NDC numbers continue to be exempt from such pricing limitations. New entries (either products or package sizes) on this revised upper limits of payment listing are marked by a triangle (). Those pharmaceuticals subject to a South Carolina Maximum Allowable Cost are identified with the acronym "SCMAC."

Providers are reminded that any product with an upper limit of payment restriction which is packaged in a specialized dosage or convenience pack (e.g., Sterapred) remains subject to the established upper limit restriction. Additionally, all products which contain the same active ingredient(s) and strength(s) are subject to the established upper limit restriction. Thus, upper limit of payment restrictions are applicable for sugar-free or alcohol-free products, provided they contain the same active ingredient(s) and strength(s) as those pharmaceuticals indicated in the attached listing.

If only one package size is listed for a given strength and form of a particular drug (e.g., spironolactone 25 mg tablet), then all available package sizes for that designated entry are subject to the stated upper limit. However, if multiple package sizes are listed for a given strength and form of a particular pharmaceutical (e.g., triamcinolone acetonide), only those specified package sizes for that entry are subject to the upper limit restrictions indicated. This policy pertains to all entries, regardless of route of administration (i.e., oral, topical, inhalation). In all instances, the stated upper limits of payment were established based on pricing information pertaining to the package size listed.

Providers are also reminded that only rebated products (whether brand name or generic) may be considered for Medicaid reimbursement. Certain listed pharmaceuticals may have both legend and over-the-counter (OTC) packaging. If the OTC items listed in this upper limits publication are also included in the current listing of covered OTC products, claims for those pharmaceuticals may be transmitted routinely through FIRST HEALTH Services Corporation's point of sale (POS) system; the listing of routinely covered OTC products may be found in the Medicaid Pharmacy Services Provider Manual. However, if rebated and usage is appropriate, OTC items not indicated as routinely covered may be considered for reimbursement via the POS system; to do so, the pharmacist must enter a specified numeric value in the PA/MC field. (Detailed billing instructions may be found in the October 2000 FIRST HEALTH Claims Processing System Manual.)

SCDHHSS-Abbott-016461

Medicaid Bulletin
November 28, 2000

Page 2

Bear in mind that when the provider agrees to dispense and subsequently bill a prescription to the Medicaid program, then the Medicaid reimbursement must be accepted as payment in full. Under no circumstances may the patient be billed the difference between the submitted charge and Medicaid's reimbursement.

The upper limit of payment for a multiple source product for which a specific limit has been established does not apply if the prescriber certifies in his/her own handwriting that a specific brand is medically necessary for a particular patient. **The prescriber's handwritten phrase "brand medically necessary" or "brand necessary" must be present on the face of the prescription.** This certification must be present on the prescription prior to billing Medicaid for any brand medically necessary prescription.

The prescriber's handwritten notation on the prescription certifying "brand medically necessary" or "brand necessary" is the only allowable means for obtaining Medicaid reimbursement for the brand name product. To further clarify, if the brand medically necessary certification is absent from the face of the prescription, a dual line prescription form does not satisfy the brand medically necessary certification requirement; the prescriber's signature on the "Dispense As Written" signature line does not satisfy the brand medically necessary certification requirement; nor does the prescriber's verbal authorization satisfy the brand medically necessary certification requirement. A "blanket" authorization does not satisfy the brand medically necessary certification requirement. Furthermore, signing a check off box on a form does not satisfy the brand medically necessary certification requirement.

Therefore, in order to avoid recoupment of Medicaid monies, care should be taken prior to billing to ensure that the appropriate certification is indicated on each prescription for those claims transmitted (and reimbursed) as brand medically necessary. When submitting a claim via the POS system, the use of the "brand medically necessary" designation (i.e., DAW = 6) is reserved only for those products with upper limits of payment restrictions established for that date of service.

"Brand medically necessary" claims are subject to postpayment review by DHHS's Division of Program Integrity, and all pertinent documentation (e.g., prescriptions or chart orders containing the specified terminology in the prescriber's own handwriting) must be retained in the provider's records. Medicaid payment will be recouped for any claim so designated if the prescriber's certification is not present on the prescription.

Requests for manual adjustments of "brand medically necessary" claims will not be honored. Detailed billing instructions may be obtained by contacting FIRST HEALTH's Technical Call Center at 1-866-254-1669 (toll-free).

Policy questions regarding this bulletin should be directed to the Department of Pharmacy Services at (803) 898-2876.
